

Established for over 35 years, we have focused exclusively on providing unbeatable office technology, and although we are a truly national operation, our success has been forged around our unique network of local offices providing on-the-spot response, rapport and reliability.

Business Continuity

It's one thing to recover from a disaster, but keeping your business and workforce running efficiently throughout the experience takes disaster recover to a completely new level. Altodigital's business continuity solution does just this!

Unforeseen disasters can have serious consequences for any business and their staff. That's why it's important to ensure you have in place a continuity programme that allows your employees to continue working, whatever the circumstances. Any loss of productivity can impact immediately.

Invest in an Altodigital continuity solution and your staff will have immediate access to crucial data and applications (post disaster), so that they can continue to work and access what they need, wherever they are.

Make your business invincible

A virtualised version of your IT infrastructure is held at one of our data centres and becomes accessible just moments after the collapse of the physical environment.

This allows employees to log onto the network in their usual fashion and continue working as before, either from home or another location, if the office is no longer available. As and when the physical infrastructure is up and running again, operations can be moved back across - with minimal downtime throughout the whole process.

Business Continuity Plans

We'll sit down and develop a bespoke business continuity plan that, in the event of a disaster, will kick in and ensure you enjoy continual uptime, without any compromises or lack of staff productivity.

Our technical team will ensure that any lost data or applications are quickly reinstalled to their pre-disaster state, so that staff can access crucial files and continue working, as before.

A Bespoke Approach

One size certainly doesn't fit all when it comes to designing a business continuity plan. We are very aware that you are unique in every sense and require a support package that reflects that.

At all times, we'll work with you and your staff to ensure disruption is minimized, you know what's happening and how we are resolving the situation.

Business is about staying ahead and offering your customers more, so we'll also help you to manage your future – providing not just continuity but surety!

IT Managed Services

Protect, support and optimise your IT infrastructure with our proven range of IT solutions. From network support, disaster recovery and business continuity plans, to print/printer security and virtualisation, we'll help your business to minimise downtime, achieve operational efficiencies and secure real cost savings.

The Benefits

- Keeps your business operating throughout a disaster
- Have your business fully functional quickly following a disaster
- Limits time lost by staff unable to work during a disaster
- Ensures your company's reputation is protected
