altodigital
your office technology partner

Established for over 35 years, we have focused exclusively on providing unbeatable office technology, and although we are a truly national operation, our success has been forged around our unique network of local offices providing on-the-spot response, rapport and reliability.

Cloud Applications

More businesses are opting to rid themselves of managing and maintaining servers and applications in favour of quicker and more cost effective cloud based computing.

Cloud applications allow you to access the files or programmes traditionally downloaded on a physical computer or server as a web based application. Migrating to the cloud allows your employees to work from anywhere, collaborate on shared documents with ease, improve disaster recovery and have access to automatic software updates.

It's estimated that 90% of UK businesses are now using at least one cloud service. Cloud computing is a flexible, capital-expenditure free investment that you can control and expand as your business grows.

SaaS, PaaS & IaaS

The cloud landscape addresses thee key areas of operation: SaaS (software as a service), PaaS (platform as a service) and IaaS (infrastructure as a service). Altodigital specialises in all three.

IaaS is the first level and runs pre-configured hardware through a virtualised interface. PaaS is the next step and includes the operating environment (operation system/application services). SaaS provides the fully functional applications on-demand that deliver specific services such as email management, CRM, ERP, web conferencing etc.

Hosted Exchange

With our hosted exchange service (a key part of Office 365), you'll be able to benefit from all the features and functionality of Microsoft Outlook, but with the added advantage of enhanced security.

Choose Altodigital as your partner and you'll be able to access your emails, view your calendar, arrange appointments and book meeting rooms remotely, knowing that your information is safe and secure.

Private Cloud

A Private Cloud is an extremely secure solution and offers premium performance. It works by housing your infrastructure, servers and storage within a secure data centre environment, operated solely for your business using your own personal hardware.

The additional security offered by the ring fenced cloud model is ideal for any organisation seeking to store and process private data, or carry out tasks of a sensitive nature.

Altodigital offers a Cloud Backup service. This takes care of all of your backup monitoring, management and administration, leaving you to concentrate on other business issues. With backup data increasingly susceptible to loss, corruption and theft, eliminating these risks is a huge benefit.

IT Managed Services

Protect, support and optmise your IT infrastructure with our proven range of IT solutions. From network support, disaster recovery and business continuity plans, to print/printer security and virtualisation, we'll help your business to minimise downtime, achieve operational efficiencies and secure real cost savings.

The Benefits

- Fixed costs allow for clear budgeting
- Automated updates and upgrades to software
- Easily add or remove users
- Minimal upfront costs
- UK based 24/7 technical support
- Easy access and scalable depending on the needs of your business
