

Established for over 35 years, we have focused exclusively on providing unbeatable office technology, and although we are a truly national operation, our success has been forged around our unique network of local offices providing on-the-spot response, rapport and reliability.

## Colocation

**Constantly trying to manage your own physical IT devices and buildings can be time consuming and tie up valuable finances. Colocation of your IT infrastructure with an Altodigital data centre provides you with a more predictable operational expenditure model.**

Many companies find that offsite colocation is a viable alternative to owning and investing in backup generators, UPS and HVAC units, and paying the ongoing costs associated with this equipment.

Colocation can significantly reduce your IT infrastructure and management costs, whilst benefiting from increased power, disaster recovery and business continuity. We can help design a high quality, network configuration that delivers ultimate availability and reliability throughout the day and night.

### UK Data Centres

Our data centres not only provide power availability, redundant cooling and world-class connectivity, they give your data the physical security you get from housing your data in a secure location.

Offloading your responsibility and costs for server hardware, storage and network fees onto our shoulders, provides you with a fixed, predictable monthly cost alongside a host of other benefits.

BASED**

### Secure Locations

We understand the importance of speed and security in your business. All of our data centres are exceptionally secure and protected by both physical and virtual security. This ensures that all of your mission critical applications are secure and always online.

If you'd like to book a personal visit to one of our UK data centres closest to you, contact our help desk and we'll arrange this for you in the near future.

### Systems that won't fail you

As one of our colocation customers, we'll ensure you have access to our technical engineers around the clock. This will give you the peace of mind that your business will run smoothly and efficiently, without major disruption.

We try and ensure that all of our data centres are extremely power efficient and, therefore, of no danger to the environment and not a drain on your finances.

As one of our colocation customers, you will have 100% secure access to our data centres and your equipment, whenever you require it.

### IT Managed Services

Protect, support and optimise your IT infrastructure with our proven range of IT solutions. From network support, disaster recovery and business continuity plans, to print/printer security and virtualisation, we'll help your business to minimise downtime, achieve operational efficiencies and secure real cost savings.

### The Benefits

- Secure data centres in the UK
- Technical support from our UK based call centre
- Fully secure locations
- 24/7 access
