> Established for over 35 years, we have focused exclusively on providing unbeatable office technology, and although we are a truly national operation, our success has been forged around our unique network of local offices providing on-the-spot response, rapport and reliability.

Disaster Recovery

There are many ways that a business could encounter a "disaster" that could result in the loss of data and applications. Are you prepared?

Altodigital's disaster recovery solution will restore business data, applications and operating systems to their pre-disater state quickly and efficiently, therefore minimizing the impact of a disaster to an organisation.

Any short or prolonged period of uncertainty can result in real damage to your reputation and lead to lack of productivity and increased costs. This can seriously restrict your ability to keep on top of customer expectations and respond to growing business demands.

Companies like yours need access to fool-proof, cost-effective services that limit the impact of any unexpected circumstances that may temporarily paralyze your operations, or prevent your staff from going about their daily business.

Prepared for the Worst?

Without the appropriate preparation in place, a unexpected disaster could be detrimental to any business.

Unfortunate events such as floods, fires and other natural disasters, although uncommon still happen, and having the attitude "it will never happen to us" can be dangerous and leave your business exposed.

Secure Your Data

As well as the the obvious 'extreme case' disasters that can affect your business, there are also more everyday occurances that can leave your business data at risk of being unaccesible for a long period of time, and in worst cases - forever.

System failures, security breaches (internally and externally) and employee negligence can all cause loss of data. Altodigital ensure that your data is secure and immediately accessible, resulting in minimal staff downtime and disruption to the business after such events.

Disaster Recovery Plans

We will work with you to create and implement a scalable full disaster recovery plan that will not only satisfy the operational needs of your business requirements, but also the financial ones.

Altodigital does not believe that one size fits all when it comes to designing a disaster recovery plan. Our bespoke solutions respond to your unique requirements, business expectations and your budget.

Working closely with your in-house team, our staff will do everything they can to minimize disruption, manage problems and get your business up and running as fast as they can.

IT Managed Services

Protect, support and optmise your IT infrastructure with our proven range of IT solutions. From network support, disaster recovery and business continuity plans, to print/printer security and virtualisation, we'll help your business to minimise downtime, achieve operational efficiencies and secure real cost savings.
