Established for over 35 years, we have focused exclusively on providing unbeatable office technology, and although we are a truly national operation, our success has been forged around our unique network of local offices providing on-the-spot response, rapport and reliability.

Leased Lines

Our internet Leased Line offers direct connectivity to the internet through a dedicated line. With the utilisation of fibre, it acts as your own dedicated access to the web, providing you with a constant, reliable and high speed connection.

Leased lines are an ideal solution for businesses where constantly staying connected is imperative such as call centres, eCommerce operations, and avoiding downtime is of primary importance to ongoing operational efficiency.

Given our Leased Line option provides you with your own connectivity without sharing the bandwith, it makes it extremely reliable, and with speeds reaching up to 1Gbps, you will also enjoy optimum performance.

Fast & Reliable

With your own Leased Line, you have sole use of the bandwidth. This means you can manage it with a greater degree of control, ie: in line with seasonal demands, and only pay for what you need.

As you are not sharing the bandwidth with anyone else, your connection will not vary should outside factors change due to unforeseen circumstances or other intervention.

altodigital
your office technology partner

Maximising your customer experience

Given a Leased Line always delivers the same speed, even at busy times, it stops users from becoming frustrated if their computer systems run slowly at peak times, which can also have a negative impact on your customer experience.

Another popular use of Leased Lines is to provide high-speed private voice and data connections inside geographically-dispersed organisations.

Dedicated support, around the clock

Customer support and service is not something that just kicks in when things go wrong – it's there around the clock, when you most need it.

All customers can contact us via one of our regional offices by email, phone or online. Given we have our own support infrastructure across the UK, there will be no waiting, queues or automated messages – just someone that can help.

We promise to answer your queries and provide support around the clock. Through our online portal we are available 24/7, 7 days a week – that sets us apart from other businesses.

IT Managed Services

Protect, support and optmise your IT infrastructure with our proven range of IT solutions. From network support, disaster recovery and business continuity plans, to print/printer security and virtualisation, we'll help your business to minimise downtime, achieve operational efficiencies and secure real cost savings.

The Benefits

- Fast, secure and reliable connectivity
- Technical support through our UK call centre
- Reduces downtime
- Improves employee and customer experience
- Use as many IP's as you need
