

Established for over 35 years, we have focused exclusively on providing unbeatable office technology, and although we are a truly national operation, our success has been forged around our unique network of local offices providing on-the-spot response, rapport and reliability.

Unified Communications

We live in a 24-hour society when the office never shuts and efficient and instant communication has never been more important. Altodigital provides a unique blend of telecommunication services that optimise your business processes, help you to control costs and ensure 100% connectivity.

Through Unified Communications (UC) you can be sure of providing users with a consistent, reliable interface and experience across multiple devices and media types. That means your organisation is always open for business wherever you are, around the clock.

Seamlessly integrated and executed, the primary benefits of investing in UC as part of a total telecommunications solution include: improved efficiency, reduced communication costs, increased revenue and better all round customer services.

Full connectivity

Any loss of connectivity can have immediate consequences in terms of your business performance and accessibility. Ensuring ongoing continuity through smart use of technology means you are always available and continue working regardless of the circumstances.

Our aim is to connect your workforce, your customers and your market to your offering through intelligent, efficient and reliable UC solutions that never stop working and delivering.

Connect faster than your competition

With our Virtual Office Pro, smart mobile apps and video conferencing solutions, you will always be ahead of your competitors and the first in line when it comes to receiving and efficiently responding to new business leads and opportunities.

With a host of clever features at your fingertips, you will be able to direct numbers, call forward, engage in integrated chat, take part in three-way conferencing and much more.

Smarter connectivity throughout your business

With Virtual Office, you will never miss a call with flexible call forwarding, benefit from instantaneous conferencing with video, engage in corporate chat, enjoy the freedom to send/receive faxes on any computer and ensure remote workers don't sound remote at all!

Hold cloud-hosted, interactive video meetings so you can see and engage with your customers, make key decisions and deal with technical issues. Our software allows you to share content and control/share meeting responsibilities more effectively.

Our advanced mobile apps ensure all devices ring at the same time, are compatible with both Apple/Android devices, have cellular network/WiFi capabilities and video call functionality.

Communication Solutions

Your business simply can't afford to lose any capability when it comes to maintaining effective communication. Altodigital provides highly efficient and affordable UC and intelligent phone solutions that lead to greater employee productivity, reduced costs and increased mobility.

The Benefits

- Improved productivity throughout your business
- Potential for reduced business costs given better use of resources
- Easy integration and installation
- Lower communication costs
- Increased mobility and connectivity
- Cloud-hosted – for sharing content and responsibilities
