

Your employees are your most valuable investment.

Keeping them productive usually means keeping up with all the technology requirements that a modern, mobile and adaptive team needs. And there are a lot of them — laptops, tablets, phones, and of course all the headsets and peripherals. Plus it all needs to function, maintain security protocols and not get in the way of work. It's a big responsibility that we'd like to take off your shoulders.

A GREAT TEAM DEPENDS ON GREAT TECHNOLOGY.

With the deployment of 5G, cloud-based systems, automated intelligence, ever-evolving security threats and more remote workers, companies need to make smart, efficient investments that don't slow down productivity or tangle up resources.

The 2020 State of IT, 2020

End User Compute delivers the latest personal computing technology without the typical headaches.

We provide end-to-end solutions built around your team — backed by a dedicated, local team to build, service and maintain the technology as well as train and support your team.

KEEP YOUR PEOPLE UP AND RUNNING	SIMPLIFY LIFECYCLE MANAGEMENT	BRING TECH AND TEAMS TOGETHER	PERIPHERALS, TOO	SAVE MONEY AND TIME	LOCAL AND INTERNATIONAL
We work behind the scenes to set up new technology and perform updates without being disruptive to your team's workday.	We manage contracts, run maintenance schedules, update software, repair and service to ensure you get the most from your investment.	Not only do we build, install and manage technology, we'll also train your people how to use it and get the most out of it simply and securely.	Everything from remote storage to headsets, wireless keyboards and all the things your team needs to get the most from the tech.	Our relationships with top hardware providers give us buying power as well as direct access to service and support as needed.	While your day-to-day service is owned by a local team and contact person, you also get the collective IT know-how of hundreds of Xerox experts worldwide.

Total support. Zero disruptions. White Glove Service from Xerox.

MAKING LARGE-SCALE TECHNOLOGY DEPLOYMENT DOABLE

We'll take initial delivery of new hardware. We unpack, set it up, tag, image, add software, sanitize and put it back in the box before delivering it. Eliminating hours of disruption, mountains of clutter and constant distractions.

SETTING UP YOUR TEAM FOR SUCCESS

Once the tech is installed, we're able to work with your IT people and train your employees on any new platforms or hardware we provide. After all, what good is technology if no one knows how to get the most out of it?

YOUR PERSONAL 24/7 HELP DESK

Our local team will provide regular maintenance and service, perform repair work and answer employee-specific needs. Whether working as your standalone IT arm or in cooperation with your internal team, we're here to keep everything and everyone working.

Our purpose is to empower people.

While we know the latest hardware, software and platforms inside out, we also know they're tools that unlock the potential in people. That belief comes first in every project we tackle and with every team we support. It's our job to help your people perform better at their jobs.

Get the most out of your technology.
